Security & Compliance Engineer with 7+ years of progressive experience spanning regulated operations, IT/network administration, and multi-tenant security engineering. Experienced in SOC operations, incident response, Microsoft 365/Azure identity controls (RBAC, MFA, Conditional Access), and security automation (PowerShell/Bash/Python). Proven ability to build secure infrastructure, reduce operational risk, and align systems with ISO 27001, NIST CSF and other frameworks.

Core Skills:

Security Engineering | Incident Response | SOC Operations
 Azure AD / M365 Security | RBAC | MFA | Conditional Access
 Network Infrastructure | VPN | SASE | Firewall Deployment
 PowerShell | Bash | Python Automation
 ISO 27001 | NIST CSF | PCI v4

Qualifications:

CompTIA® A+, Network+, Security+, and Cloud+ Certified.

Kaseya® Certified in RMM, Cybersecurity, Dark Web ID, EDR, RocketCyber, and Networking.

Education:

Shoreline Community College
 (Music Performance)

Security and Compliance Engineer

CMIT Solutions (Nov. '22 – Dec. '25)

Seattle, WA

-Security engineer supporting ~200 clients and ~3,000 endpoints across multi-tenant MSP environments.

-Served as primary SOC analyst and incident responder; performed investigation, containment, and remediation across endpoint and identity-based threats.

-Led deployments of Microsoft 365, Azure AD, Google Workspace, SASE VPNs, RBAC, MFA, and Conditional Access policies.

-Supported compliance alignment with ISO 27001, NIST CSF, PCI v4, and CMMC frameworks.

-Reduced RMM tooling costs by ~\$10K annually by engineering and deploying Tactical RMM/RustDesk.

Independent IT/Security Engineer.

Self-Employed/Esoteric Labs LLC (Jan. '21 – Feb. '26)

Denver, CO – Seattle, WA

-Led SaaS data migrations for SMB clients, ensuring data integrity validation and post-migration security hardening.

-Performed Firewall configurations, Network installations, WiFi diagnostics and RF optimization across mixed-device environments.

-Designed isolated security infrastructure and developed automation in Bash, Python, and PowerShell for system auditing and operational efficiency.

-Founder of progressive tech company, Esoteric Labs.

IT/Network Administrator

DHE Computer Systems (Nov. '19 – Jan. '22)

Centennial, CO

-Sole L1/L2 administrator supporting 100+ SMB clients and ~1,500 endpoints.

-Deployed and managed MDM (Intune/JAMF) and automated provisioning/patching via PowerShell/Bash.

-Designed and deployed network infrastructure (APs, switches, firewalls, routers) and Microsoft 365/Exchange/VPN environments.

Logistics and Compliance Manager

RME group (Sep. '16 – Jun. '19)

Denver, CO

-Audited inventory and cash operations within a highly regulated retail environment, ensuring regulatory compliance.
