Security & Compliance Engineer with extensive experience spanning regulated operations, IT/network administration, and multi-tenant security engineering.

Core Skills:

Identity & Access: Microsoft Entra ID (Azure AD), Active Directory, Group Policy, RBAC, MFA, Conditional Access, SSO

Cloud & Virtualization: Microsoft 365, Google Workspace, Azure, Proxmox VE, VMware (ESXi/vSphere), Hyper-V

Security & Compliance: Endpoint protection, vulnerability remediation, system hardening, SOC, incident response, ISO 27001, NIST CSF, PCI v4, CMMC

Scripting & Systems: PowerShell, Bash, Python, Windows Server, Linux, Docker, Intune, JAMF, Tailscale, WireGuard, UniFi, pfSense

Certifications:

CompTIA® A+

CompTIA® Network+

CompTIA® Security+

CompTIA® Cloud+

Kaseya® RocketCyber

Kaseya® Cybersecurity

Kaseya® Dark Web ID

Education:

Shoreline Community College
(Music Performance)

Systems Engineer/Founder.

Self-Employed/Esoteric Labs LLC (Nov. '25 – Jun. '26)

Denver, CO – Seattle, WA

Led SaaS migrations and enterprise infrastructure deployments (firewall, networking, WiFi/RF) for SMB clients; enforced post-migration security hardening and business continuity validation.

Designed isolated security infrastructure and developed automation in Bash, Python, and PowerShell for system auditing, operational workflows, governance documentation, and change management.

Managed virtualization environments and maintained multi-VM infrastructure using Hyper-V, Proxmox VE, and VMware.

Security and Compliance Engineer

CMIT Solutions (Nov. '22 – Nov. '25)

Seattle, WA

Supported ~200 clients and ~3,000 endpoints across multi-tenant MSP environments as primary SOC analyst; performed incident investigation, containment, and remediation across endpoint and identity-based threats.

Administered Microsoft 365, Entra ID (Azure AD), Active Directory, Group Policy, SASE VPNs, MFA, RBAC, and Conditional Access; led deployments of M365, Google Workspace, and other cloud-based infrastructure services.

Maintained compliance alignment with ISO 27001, NIST CSF, PCI v4, and CMMC; applied endpoint protection, vulnerability remediation, and system hardening across regulated client environments.

Engineered Tactical RMM/RustDesk deployment reducing tooling costs by ~\$10K annually.

Systems Administrator

DHE Computer Systems (Nov. '19 – Oct. '22)

Centennial, CO

Sole L1/L2 administrator for 100+ SMB clients and ~1,500 endpoints; deployed and managed MDM (Intune/JAMF) and automated provisioning/patching via PowerShell and Bash.

Designed/ deployed network infrastructure (APs, switches, firewalls, routers) and managed Microsoft 365/Exchange and VPN environments across multi-site clients.

Logistics and Compliance Manager

RME group (Sep. '16 – Jun. '19)

Denver, CO

Audited inventory and cash operations within a highly regulated retail environment, ensuring regulatory compliance.
