<https://github.com/esotericlabs-connor>

IT security & compliance engineer with extensive experience spanning regulated operations, IT/network administration, and multi-tenant security engineering.

Core Skills:

Identity & Access: Microsoft Entra ID (Azure AD), Active Directory, Group Policy, RBAC, MFA, Conditional Access, SSO

Cloud & Virtualization: Microsoft 365, Google Workspace, Azure, Proxmox VE, VMware (ESXi/vSphere), Hyper-V

Security & Compliance: Endpoint protection, vulnerability remediation, system hardening, SOC, incident response, ISO 27001, NIST CSF, PCI v4, CMMC

Scripting & Systems: PowerShell, Bash, Python, Windows Server, Linux, Docker, Intune, JAMF, Tailscale, ZTNA, WireGuard, UniFi, pfSense

Certifications:

CompTIA® A+

CompTIA® Network+

CompTIA® Security+

CompTIA® Cloud+

Solutions Architect *(part-time, contract)*

Stillwater Group (Feb. '26 - Aug. 26')

Seattle, WA

Performing cybersecurity compliance engineering for a regulated energy-sector client pursuing dual CMMC Level 2 and NRC 10 CFR 73.54 certification. Conducting system/software inventory audits, asset definition, and network architecture/data flow documentation.

Developing foundational SSP/CSP components aligned with NIST SP 800-171, establishing risk registers, control gap analyses, and remediation roadmaps.

Security and Compliance Engineer

CMIT Solutions (Nov. '22 - Dec. '25)

Seattle, WA

Supported ~200 clients and ~3,000 endpoints across multi-tenant corporate MSP environments as primary SOC analyst; performed incident investigation, containment, and remediation across endpoint and identity-based threats.

Administered Microsoft 365, Entra ID (Azure AD), Active Directory, Group Policy, SASE VPNs, MFA, RBAC, and Conditional Access; led deployments of M365, GCP/Google Workspace, and other cloud-based infrastructure and SaaS/PaaS services. Maintained compliance alignment with ISO 27001, NIST CSF, PCI v4, and CMMC L1/L2.

Systems Administrator II

DHE Computer Systems (Nov. '19 - Oct. '22)

Denver, CO

Sole L2 administrator for ~100 SMB clients and ~1,500 endpoints; deployed and managed MDM (Intune/JAMF) and automated provisioning/patching via PowerShell, Bash and administered various Cloud/SaaS platforms such as 365 and Google Workspace.

IT Engineer I/II

RME Group (Jun. '17 - Nov. '19)

Denver, CO

L1/L2 administrator for multi-franchise cannabis manufacturer and retailer. Designed/ deployed network infrastructure (APs, switches, firewalls, routers, CCTV cameras/NVR) and managed Microsoft 365/Exchange and SaaS apps across multi-site environments.
